

Education

Shenzhen University

Bachelor of Engineering, Electronic Information Engineering

Professional Summary

Results-driven Full-Stack Engineer with 7+ years of enterprise development experience, focusing on cross-platform applications, Node.js backend services, real-time audio/video systems, legacy system refactoring and hardware SDK integration. Proficient in full project lifecycle delivery. Experienced in AI-assisted development to optimize workflow. Alibaba Cloud (ECS/OSS) is only used for personal open-source projects.

Professional Experience

Guangzhou Gaoke Communication Technology Co., Ltd. | Full-Stack Engineer

Jun 2020 – Feb 2026

- Delivered 20+ enterprise projects with 10+ Android terminal apps and 5 business platforms; built Node.js real-time signaling and data synchronization services to support stable high-concurrency business operation.
- Led full lifecycle app iteration and Vue2 to Vue3 + TypeScript tech stack migration; independently developed tablet smart interview application, optimized audio-video latency via NVue native rendering.
- Refactored 3 legacy systems into a unified remote meeting platform, optimized weak-network audio-video quality with Socket.IO and WebRTC, and built unified hardware SDK adaptation layer to reduce integration costs.
- Developed standard and domestic IT environment compatible platform versions with full ecosystem adaptation; adopted Docker for application packaging and on-premises deployment.
- Integrated Trae, DeepSeek and Codex into development workflow to improve coding efficiency and reduce production defects; supported project bidding, acceptance and technical exhibition work.

Guangzhou Weijing Huyu Information Technology Co., Ltd. | Frontend Developer

Oct 2018 – Jun 2020

- Developed full-stack frontend for multiple websites and mobile applications, ensuring on-time and early project delivery.
- Resolved core performance and UI rendering bottlenecks of incomplete scheduling projects to guarantee successful acceptance.
- Responsible for cross-team coordination and client communication, awarded Excellent Employee for outstanding project delivery.

Projects

Cross-Platform Smart Terminal Suite

Multi-terminal business solution with offline data synchronization and hardware peripheral adaptation. Tech Stack: UniApp, Vue3, TypeScript, NVue, Node.js, WebRTC, SQLite, Vite

Unified Audio-Video Meeting Platform

Integrated legacy systems with optimized weak-network real-time communication. Tech Stack: Vue2, Socket.IO, WebRTC, Node.js, Element Plus

Video Behavior Analysis Platform

Enterprise streaming platform with full domestic environment adaptation. Tech Stack: React, UmiJS, Ant Design, video.js, Docker

Technical Skills

Frontend & Cross-Platform: Vue 2/3, React, TypeScript, UniApp, NVue, Vite Audio-Video & Hardware: WebRTC, Socket.IO, HLS/RTSP, Hikvision/Dahua SDK integration Backend & DevOps: Node.js/Express, SQLite, Docker; Alibaba Cloud ECS/OSS (personal projects) AI Tools: Trae, DeepSeek, Codex Domain Skills: Legacy system refactoring, domestic IT adaptation, full-cycle enterprise project delivery
