

Professional Summary

Results-driven Frontend/Full-Stack Engineer with 7+ years of experience building enterprise-grade digital solutions for public security, judicial, and enterprise clients. Specializes in cross-platform app development, real-time audio/video systems, legacy system refactoring, and hardware SDK integration. Proficient in Vue, React, UniApp, and Node.js, with end-to-end delivery expertise from bidding to project acceptance. Focused on optimizing performance, scaling systems, and adapting solutions to domestic IT ecosystems.

Professional Experience

Guangzhou Gaoke Communication Technology Co., Ltd. | Development Engineer

Jun 2020 – Feb 2026

- Led frontend architecture design for a smart hardware product line, delivering 10+ terminal apps and 5+ system platforms deployed across 20+ public security/correctional facility projects
- Refactored Android smart terminal apps (V1–V4) by migrating from Vue 2 to Vue 3, and independently built a tablet-based smart interview application
- Consolidated 3 isolated remote meeting systems into a unified platform (owned 70% of architecture/feature work), driving strong client satisfaction
- Revamped UI and iterated features (V1–V4) for a video behavior analysis platform, launching standard/domestic-adapted versions (latter became the primary on-site deployment solution)
- Supported 10+ major project bids and 20+ acceptance tests, including technical demos at national police equipment expos

Guangzhou Weijing Huyu Information Technology Co., Ltd. | Frontend Developer

Oct 2018 – Jun 2020

- Independently built end-to-end frontend for "Xiyu Tour" website and "Training Material Digitalization System" app, delivering projects ahead of schedule
- Completed a 40%-built flight simulator scheduling system (core modules: planning, reservation, notifications) and resolved critical UI/table performance issues
- Awarded "Excellent Employee" (cash bonus) for exceptional project delivery, client communication, and cross-team coordination

Key Projects

Smart Terminal Application Suite (Correctional Facility Solution)

Cross-terminal hardware-software solution for Android large-screen terminals, tablets, and PC management systems (deployed across dozens of provincial correctional facilities)

- Migrated tech stack (Vue 2 → Vue 3/TypeScript) and rewrote core modules, improving code maintainability by 60%+
- Replaced Vue with NVue native rendering for streaming, reducing audio/video latency by 80%+ and eliminating playback lag
- Built a unified hardware adaptation layer for Hikvision/Dahua/Laibang SDKs, streamlining biometric recognition/serial communication integration
- Tech Stack: UniApp, Vue 2/3, TypeScript, NVue, SQLite, WebSocket, WebRTC, Vite, Element Plus

Remote Meeting Integrated Platform (Judicial Audio/Video Solution)

Unified platform for lawyer/family visits and remote interrogation (optimized for unstable networks)

- Refactored 3 independent systems into a modular architecture, boosting code reusability by 70%+ and cutting maintenance costs
- Built real-time backend services Node.js/Express.js/Socket.IO for signaling, file transfer, and instant messaging
- Implemented adaptive bitrate adjustment, increasing video call stability to 95%+ in weak network environments
- Tech Stack: Vue 2, Vuex, Socket.IO, WebRTC, Node.js, Express.js, Element Plus

Video Behavior Analysis Platform (Public Security Monitoring)

Enterprise-grade analytics platform with standard/domestic-adapted versions for public security use cases

- Architected frontend (React/UmiJS/Dva/Ant Design) with reusable components, improving development efficiency
- Enabled dual-version parallel development via environment configs, reducing maintenance complexity
- Integrated multi-player components (video.js, Jessibuca) to support HLS/RTSP streams across all major browsers
- Tech Stack: React, UmiJS, Dva, Ant Design, video.js, hls.js, Axios, Docker

Technical Skills

Category	Core Skills
Frontend Frameworks	Vue 2/3 (Vue Router, Vuex, Pinia), React (UmiJS, Dva, Next.js), TypeScript
Cross-Platform	UniApp, NVue, HTML5+ Runtime, Android APK Packaging, WeChat Mini Programs
Audio/Video & Hardware	WebRTC, WebSocket, Socket.IO, HLS/RTSP, Hardware SDK Integration
Engineering & DevOps	Vite, Webpack, ESLint, SCSS/Less, Docker, Frontend Performance Optimization
Backend & Data	Node.js (Express.js), SQLite, RESTful APIs, Axios
Domain Expertise	Domestic IT Ecosystem Adaptation, Legacy System Refactoring, Web GIS

Education

Shenzhen University

Bachelor of Engineering in Electronic Information Engineering
