

Huajin Wu

Frontend Engineer

Location: Guangzhou, China | Email: wuhuajin09@163.com
GitHub: <https://github.com/whjin> | Portfolio: <https://wuhuajin.com>

PROFESSIONAL SUMMARY

Results-driven Frontend Engineer with 13 years of full-cycle software development experience, specializing in enterprise-grade web/mobile applications and hardware-integrated solutions. Expert in Vue/React ecosystems, cross-platform development (uni-app), and real-time audio/video systems. Proven track record of leading technical architecture, optimizing performance by 80%+, and delivering mission-critical projects for public safety and enterprise clients. Skilled in cross-functional leadership, legacy system refactoring, and end-to-end project delivery.

TECHNICAL SKILLS

- Frontend Frameworks: Vue 2/3 (Vuex/Pinia), React (UmiJS/Dva), TypeScript, Element Plus, Ant Design
- Cross-Platform & Media: uni-app, NVue, WebRTC, HLS/RTSP, video.js, Hikvision/Dahua hardware SDKs
- Build & DevOps: Vite, Webpack, ESLint, Docker, Git, Android APK/Web packaging
- Backend & Real-Time: Node.js/Express, Socket.IO, WebSocket, Axios, SQLite
- Tools & Libraries: ECharts, SCSS/Less, Android Studio, Jessibuca, rich text editors

PROFESSIONAL EXPERIENCE

Guangzhou Gaoke Communication Technology Co., Ltd.

Frontend Technical Lead | Jun 2020 – Feb 2026

- Led frontend architecture for 3 core product lines (smart terminals, remote meetings, video analytics) deployed across 20+ public safety projects nationwide
- Delivered 3+ Android terminal apps end-to-end; led Vue2 → Vue3/TypeScript migration for V4, improving code maintainability by 60%
- Consolidated 3 siloed remote meeting systems into a unified platform, increasing code reuse by 70% and cutting long-term maintenance costs
- Optimized streaming performance via NVue native rendering, reducing video latency by 80% and boosting weak-network call stability to 95%
- Provided technical bidding support for 10+ major projects and led 20+ final client acceptances; supported national law enforcement expo demonstrations

Guangzhou Weijing Huyu Information Technology Co., Ltd.

Frontend Developer | Oct 2018 – Jun 2020

- Built 2 full frontend products (travel website, training materials app) from scratch, delivering ahead of schedule and passing client acceptance early
- Rescued a 40% complete flight simulator scheduling system, resolving critical UI rendering and drag-and-drop performance bugs
- Earned Outstanding Employee award for cross-functional coordination, client responsiveness, and consistent on-time delivery

Shenzhen Gongji Technology Co., Ltd.

Configuration Design Team Lead | Jul 2013 – Jun 2018

- Delivered 300+ data center monitoring configurations, averaging 20+ monthly projects and exceeding annual performance targets
- Standardized departmental templates and workflows, reducing project delivery cycle time by 30%
- Trained 5+ junior engineers and coordinated cross-departmental projects for enterprise clients including Ping An and China Southern Power Grid

KEY PROJECTS

1. **Smart Terminal Platform** (uni-app, Vue3, TypeScript, NVue)

Offline-capable Android/tablet solution for correctional facilities. Encapsulated unified hardware adaptation layer for multi-vendor SDKs; implemented SQLite local sync to ensure business continuity.

2. **Remote Meeting Three-in-One Platform** (Vue2, Node.js, WebRTC)

Unified lawyer/family/remote interrogation systems. Built real-time backend with Socket.IO; encapsulated peripheral SDKs with error handling, reducing integration complexity by 60%.

3. **Intelligent Video Analytics Platform** (React, UmiJS, Docker)

Enterprise-grade analytics system with multi-browser streaming support. Delivered both standard and China government-compliant localization versions for domestic hardware/software stacks.
